

REMARKS

This is a continuation of Serial No. 10/318,029, which is a continuation of 09/847,663 filed May 3, 2001 (now U.S. Patent No. 6,524,714), the entire contents of which are hereby incorporated herein by reference in this application.

Claims 1-42 have been canceled, and new claims 43-71 added. Thus, claims 43-71 are now pending.

With respect to the HCl 5% solution language of claim 43, this is supported in the instant specification for example in paragraph [0077].

With respect to the index of refraction aspect of claim 44, see paragraph [0043] of the instant specification.

With respect to the 6-20% aluminum aspect of claim 45, see paragraph [0045] of the instant specification.

With respect to the thickness in claims 48-50, see Table 1 on page 12 of the instant specification.

With respect to pinholes referred to in claim 61, see paragraph [0077] of the instant specification.

With respect to the sheet resistance and emissivity aspects of claims 62-66 and 69-71, see paragraph [0066] of the instant specification.

All claims are respectfully submitted to be in condition for allowance. If any minor matter remains to be resolved, the Examiner is invited to telephone the undersigned with regard to the same.

NEUMAN et al.
Appl. No. To be Assigned
February 13, 2004

Respectfully submitted,

NIXON & VANDERHYE P.C.
